

“SLOW DOWN” THE CLOCK OF AGING

HOW DOES IT WORK?

By using **minerals from the Salt of the Dead Sea**, in combination with **vitamin C** and **hyaluronic acid**, your cells can be nourished down to the muscle level. The lack of hyaluronic acid due to aging or delayed production will be replenished to previous levels. This makes it easier for your cells to renew themselves. This puts your cell integrity and your entire immune system to a healthier level, potentially preventing future problems.

Most clients feel reborn and look younger after just one cure. The Nano CellCare concept makes it possible to work at the cellular level with a variety of active nutrients.

WHAT CAN I EXPECT?

Depending on your age, your genes and predisposition, a skin rejuvenation up to 8 to 12 years can be achieved in just 6 months with one treatment once a week. Follow-up treatments can then be scheduled once a month or once every 2 months to maintain the achieved level.

Nano Healthcare is the first to offer the possibility to “slow down” the clock of aging, and to make your skin tissue and underlying muscles and tendons younger and healthier again based on Nanorization of natural ingredients.
